## EARTHQUAKE SHAKES CALIFORNIA AGAIN

SAN FRANCISCO, Mar. 10.—A sharp earthquake shock was felt tonight from San Luis Obispo, in Southern California, to Santa Rosa. The shock caused a scare and started numerous theater panics, but no damage was done.

In the San Francisco and Oakland theaters many people jumped from their seats when the shock came and started for the exits. They were promptly stopped.

All over both cities thousands of people rushed from buildings of all sorts into the streets.

At San Jose there was a slight theater panic.

The shock was especially severe at Modesto and Watsonville. In both of these cities the Western Union telegraph operators left their keys and fled from their offices.

The seismograph at the Lick Observatory, Mount Hamilton, showed the duration of the shock to have been eight seconds.

**COASTWISE BILL IS ON.**  
WASHINGTON, D. C., Mar. 10.—Delegate Kalaniana'ole and his secretary, George B. McEllis, spoke today before the House Committee on Territories on the merchant marine bill proposing a suspension of coastwise shipping regulations as applied to passengers between Hawaii and the mainland. The bill provides for suspension for a period of six years.

Congressman Julius Kahn of California opposed the measure, and representatives of the seamen's and marine engineers' unions also appeared before the committee and voiced their opposition to the bill.

Kahn stated during the hearing before the committee that suspension of the coastwise regulations would throw the passenger business between California and Hawaii into the hands of the Japanese steamship companies.

## EARTH WILL BUDGE HALLEY'S COMET

**The Fast Moving Visitor  
Is Gaseous, And The  
Earth Solid**

In a recent address delivered by Prof. Edwin B. Frost, director of the Yerkes observatory at Williams Bay, Wisconsin, the following facts in regard to Halley's comet may prove of interest to Bulletin readers:

"Halley's comet, on which all eyes in the astronomical world are now centered, is about 1,000,000 times as big as the earth. Yet although the earth's gravity may change the orbit of the comet the earth's path through the sky will be unaffected by the approaching proximity of the two bodies."

This supplemental information contained in a "circular respecting observation of Halley's comet, 1910," which has just been issued by the Astronomical and Astrophysical Society of America. The circular says that an expedition to observe and photograph Halley's comet from the Hawaiian Islands is to be sent out by the society, and sets forth that:

"In view of possible large perturbations arising from the close approach of the comet to Venus on May 1 and to the earth on May 16, meridian observations are especially desired during the period in which the comet is sufficiently bright for that purpose."

"What are these possible large perturbations?" Prof. Frost was asked.

"That merely means," was the reply, "that on those dates the comet will be near enough to the planets mentioned to be affected by their attraction."

"Will that affect their orbits?"

"It won't affect the orbit of Venus or of the earth, but it is likely to affect the comet's orbit. That is one reason why we want to get meridian observations, which will show almost exactly these orbital changes."

"There will be an interesting spectacle, by the way, on May 1, when the comet is near to Venus. The planet and the comet will be practically the same distance from the earth and every one will be able to see their relative size."

"The comet's bulk exceeds that of Venus about 1,000,000 times. It is not solid matter, however. It is gaseous, and its mass is comparatively slight. Therefore its attraction will not affect the planets, while the solid heavy planets are likely to affect it a good deal. The earth and Venus are about the same size, so that the earth too is about one-millionth of the size of the comet."

Frederick Ellerman of the Solar Observatory at Pasadena, Cal., will head the Hawaiian expedition.

The circular on Halley's comet was issued by the committee on comets of the society. On this committee are Prof. George C. Comstock of Madison, Wis.; Edward E. Barnard and Edwin B. Frost of the Yerkes observatory; Charles D. Perrine and Edward C. Pickering of Harvard University.

Says the circular:

"The close approach of the comet to the earth promises unusual opportunity for a study of the physical conditions that obtain in such a body, and as an indispensable basis for such study, the committee recommends a photographic campaign as long and as nearly continuous as possible. The comet's close proximity to the sun's direction at the time of maximum brilliance imposes serious limitations upon this program, and widely extended co-operation will be required throughout the whole circuit of the earth if this ideal of a continuous photographic record is to be even remotely realized."

"All meteors are bits of solid matter—supposed to be debris of comets—

## WHEN STOMACH BLOOD AND NERVES GO ON A STRIKE

Do you know what "atonic dyspepsia" means? It is, perhaps, the commonest form of stomach trouble. Most people have had it, have it now or will have it some day.

It is caused by a lack of tone of the system, debilitated stomach, blood or nerves, for these three are intimately dependent on one another. Stomach trouble robs the blood of nourishment, thin blood means starved nerves, nervousness and neuritis.

And it is precisely this interdependence of the stomach, blood and nerves that makes Dr. Williams' Pink Pills such a valuable home remedy. A blood builder and nerve tonic, they keep the stomach in perfect condition, provided it is not abused by improper diets.

Mrs. E. J. Burdick, a farmer's wife, of Campbell, Cal., was cured of stomach trouble by Dr. Williams' Pink Pills and recommends them to other sufferers. She says:

"Three years ago I had stomach trouble and nervousness and think it was due to overwork. My stomach did not seem to digest the food and I got so that I could not eat much of anything. This caused me to lose my strength away and, while I was not confined to bed, I had to give up my work. I was very nervous and easily excited. I could not seem to get any strength and was very pale."

"I was treated by two doctors who said that my blood was impoverished. I grew worse. If anything, under their treatment. My daughter read about Dr. Williams' Pink Pills and brought home a box for me to try. Although I had been sick for several weeks, I was soon helped by the pills. My appetite picked up and the food was digested. I began to get stronger and in a short time I was cured. I am glad to tell of my experience which I hope will be of help to other sufferers."

The remedy that cured Mrs. Burdick is guaranteed free from opiates or harmful drugs.

Dr. Williams' Pink Pills are sold by all druggists, or will be sent, postpaid, on receipt of price, 50 cents per box; six boxes for \$2.50, by the Dr. Williams Medicine Company, Schenectady, N. Y. A copy of our diet book will be mailed free to anyone who wants to be cured.

## NEARBY FISHING WILL WAIT AWHILE

**Board of Health Thinks It Advisable  
to Have No Harbor Fish Taken  
While There Is Suspicion of Disease Present.**

Notwithstanding the fact that from the results of a later and more thorough investigation of the sickness on the Tanager Maru, now held in quarantine, it has been decided that the apparent malady on board the vessel is not cholera, the Board of Health has decided to establish prohibitive fishing limits about the harbor.

The flat to that effect has not been issued yet but it is up to President Mott-Smith to do so.

A harbor-fishing enterprise was to be started today but the Board has seen fit to put a stop to it until the waters about the harbor have cleared up to an extent that there would be no danger of contamination from cholera-tainted fish.

In answer to an objection to such an order regarding nearby fishing by J. F. Morgan, Dr. Hobdy explained how important it was to throw every safeguard about the city and to take no chances when there was any suspicion of the dread disease being near the city.

It is probable that the non-fishing order will be issued today.

## RECREATIONS

**AT THE EMPIRE.**  
"Trained Birds," which was shown at the Empire, was one of the most wonderful and interesting story pictures; it held the attention of the children from start to finish and the grownups were equally fascinated. Today and tomorrow "Blessington's Bonny Babies" is another of those story pictures which not only amuse but instruct; it shows the interior of a doll factory, of how they are made and who they are made for. "Who Discovered the North Pole?" is a picture which should be seen by all who are interested in this world wide discussion. Comedies: "He fell in love with his wife;" can anyone in their wildest imagination conceive of such a possibility? "Why Girls Leave Home?" This is the momentous question—"Why?" Miss Wall will not appear at the Empire.

**PARK THEATER.**  
"The Senorita," one of Sileg's great western pictures, will be the feature film at the Park for the balance of the week. Being taken in the West it is full of beautiful natural scenery, exciting action and good horsemanship. There will also be an excellent number of other subjects, among which will be one of those sidesplitting comedies, Walker and Sturm, the two best jugglers ever seen here, will, by popular request, introduce a part of their famous tennis racket act which to those who have seen it needs no word of comment and is well worth seeing again; to those who have not seen it, don't miss this opportunity to see it.
